### **Who am I?**

I'm an extremely driven and goal-oriented intermediate level software engineer and web developer. Adaptable to a variety of languages and frameworks and can pick up new languages quickly. Experience with dynamic database driven web design as well as database management. Competent with all levels of product development and can offer valuable experience towards idea conception, code creation, and UI layouts. Customer service and sales background allow me to get into the mind of the consumer and tailor the product to the specific needs of the user. When given any task, I focus and set out to reach my goal in the most efficient and timely manner.

### **Experience Summary**

- More than 3 years of diversified and challenging programming experience
